

Hasse Lake

Surface Area
81 Hectares (200 Acres)

Maximum Depth
9.1 metres (30 feet)

Elevation (ASL)
730 metres (2,395 feet)

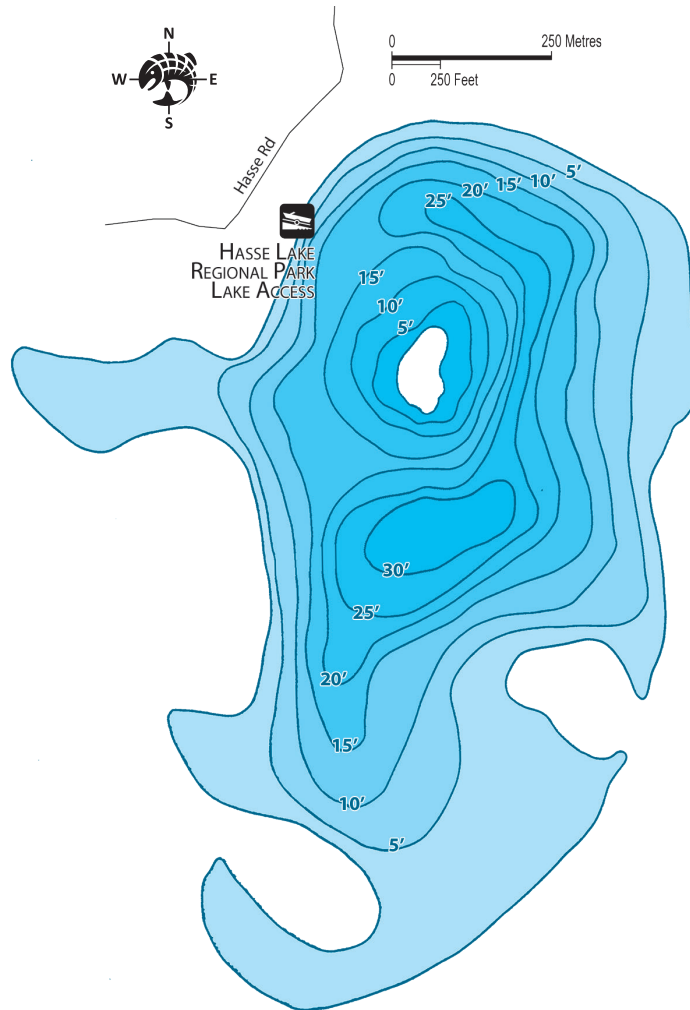

Survey Date
June 1970

Contour Units
Feet

Hasse Lake is another relatively shallow lake, one of the region's many pothole lakes. These lakes are called pothole lakes because they have no inlet or outlet. These are generally very productive lakes and provide excellent habitat for fish.

Hasse Lake used to be a local favourite and can still be a good place for a family ice fishing trip. In recent years, reports are that fishing had been slow. However, after a couple of years of downturn, it appears that fish stocks may be rebounding.

General provincial regulations apply here. At one time, Hasse Lake was stocked with rainbow trout, as were many pothole lakes, but this was discontinued because of illegal stocking of pike and perch.

Reports from summer 2014 suggest the trout numbers are low, but there are still big jackfish to be hooked.

After a severe winter kill in 2010, the province continues to stock the lake with perch and pike instead of reverting back to a trout fishery.

LAKE ACCESS

A short drive west of Edmonton. Follow Hwy. 16 to secondary Hwy. 779. Turn left and follow for about six km to Hwy. 628, also known as Township Road 524. Turn right and continue along this road for roughly 30 km until Hasse Lake.

There is a day-use regional park with a boat launch.
